*Online self-paced delivered units are not timetabled. Given the nature of the course, a 1-hour lecture has been planned every three weeks. Lecturers determine the time for lectures in consultation with students at the beginning of the semester. Lecturers communicate the agreed dates to the course coordinator who in turn puts together a schedule for all students. In past semesters, afternoons (usually after 4pm or 5pm) generally suited students as most of them work fulltime.
